

# Are your office lights a real headache?

That could be because:

- they flicker\*
- they're too bright (or too dim)
- light-levels vary too much across rooms

Energy At Work fit LED lighting where you can change your own light-levels

...and they save **50-90% energy**

Ring us to hear about grants to help you on Hertford: **01992 699698**
