

# Is your factory/warehouse dark because your 8ft tubes failed?

(They cost a fortune now they're illegal to make)

Adapt your lights to use **energy-saver T5 tubes** using our **ClickSave adapters!**

- **Save over 50% energy**
- **Price little-more than the cost of a tube**

## ClickSave Energy-Saving T5 Tube Adapters

Slim efficient T5 fluorescent tubes can last up to **four times** as long as your old tubes...  
... that means lower maintenance costs.

ClickSave also avoids the wasted energy of your light-fitting's internal control gear.

Lots of companies are using our tube-conversion retrofit kits.

- **Calm, flicker-free lighting**
- **Low maintenance costs (fewer tube-changes)**

**energy**  
at work

Herts Mercury Area Winners 2012

Errors and omissions excepted. Advice is general; figures are estimates pending site surveys. PF Capacitors and/or ballasts may need bypass, particularly in older light fittings or those with HF ballasts. Professional advice must be sought for safety and compliance reasons. May require qualified installation. Specifications may change.
