

Save up to 60% energy with 4x18w modular lights and give your staff or customers optional “wide-awake lighting”

Typical energy-savings:

4 x 18 Watt fitting (including magnetic ballasts):	86 Watts typical
GreenCat 2 x 16 Watts	32 Watts
GreenCat extra-bright 2 x 21 Watts	42 Watts

Kit is available as just energy-savings (“Stage 1”) or with special diffuser kit “Stage 2”

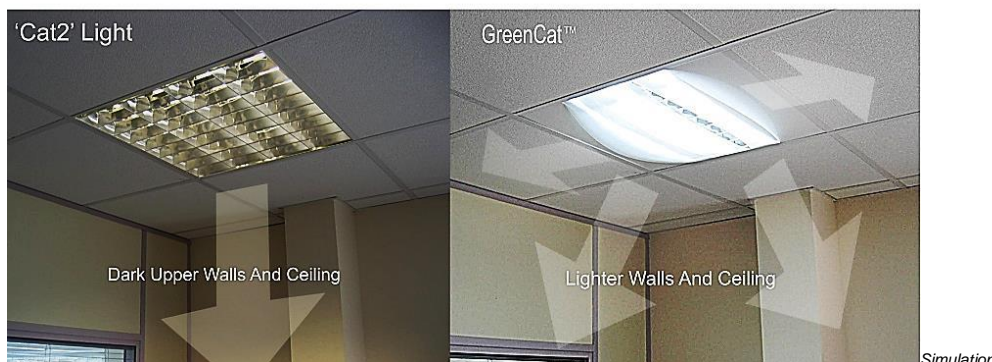

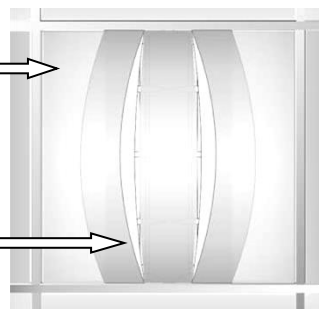

STAGE 1 - Two special 2ft T5 adapters are inserted into existing light fitting instead of needing four tubes*.

STAGE 2 - Adding optional diffuser-kit:

White blanking plates are inserted to conceal unused unused old tubes.

Diffuser reflects some light up to the ceiling and sideways into the room for a comfortable diffused light that makes the most efficient use of the light.

More information about ClickSave advanced T5 tube adapters and GreenCat diffusers at www.energyatwork.co.uk
Good lighting needs good advice. We can visit sites to help decide the best lighting method.

2012 Group Finalists *most lights will require a minor wiring-change for which we provide instructions

Errors and omissions excepted. All figures and specs are estimates pending site surveys. Any advice given is of a general nature.
